

$(0,0)$ is separated from other three (clear separation)
1 & 0 (close)

Since NOR is the inverse of OR, separating line is still the same, but sides are flipped
flip the activation.

i.e. $w_0 = 0.1$, $w_1 = -0.1$ & $w_2 = -0.1$

Thus $act = 0.1 - 0.1x_1 - 0.1x_2$
